

Let the Bots Fight

Let the Bots Fight is a list-building competition where commanders build a force that Princess, the MegaMek bot, will control in the tournament.

List Building

Commanders may submit a single list of units that 'fit' on a modified Union class dropship. Lists should be submitted as a link to [MekBay](#). Lists must adhere to the following guidelines:

- Lists may only contain units from a single era and faction on the [Master Unit List](#)
 - Era: Clan Invasion
 - Faction: Inner Sphere, IS Clan, Periphery, and Mercenary factions are permitted. HW Clan and Other factions are not permitted.
- BV: The list cannot exceed 10,000 BV. The full list is used in each scenario.
- All units must be valid units on the Master Unit List (MUL)
- Allowed unit types:
 - BattleMechs
 - OmniMechs

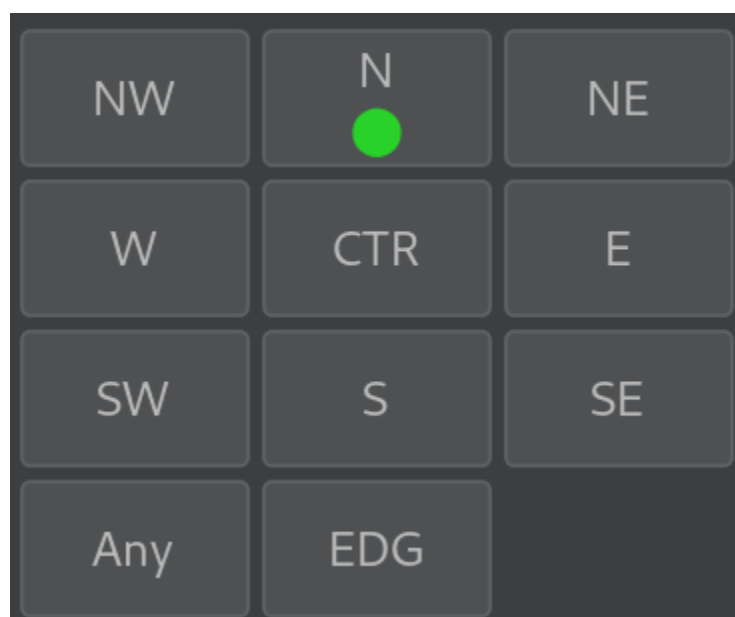

- IndustrialMechs
 - ProtoMechs
 - Combat Vehicles
 - Conventional Infantry
 - Battle Armor
- The force must fit into 15 dropship bays:
 - 15 bays max
 - 12 'Mech bays max (1 'Mech or 1/2 superheavy 'Mech per bay) (Battle/Omni/Industrial)
 - 2 ProtoMech bays max (up to 5 ProtoMechs per bay)
 - 5 Combat Vehicle bays max (up to 2 Combat Vehicles or 1 superheavy Combat Vehicle per bay)
 - 2 infantry bays max (each bay can hold up to 15 tons of infantry or a single infantry unit greater than 15 tons)
- Rules:
 - Units must use Introductory, Standard, or Advanced rules
 - The force may include a single Unique or Experimental unit
- Skills:
 - Skills cannot differ by more than 2
 - Skill levels must be between 2 and 6, inclusive
 - E.g. 2/4 is permitted, but 1/3 (skill below 2) or 3/6 (difference greater than 2) is not
- C3:
 - If the units in the list use C3, then the list must include the BV cost increase for using C3
 - Units with C3 hardware may be included without being part of a C3 network, but this must be noted in the submission
- Ammunition
 - All weapons systems will use standard ammunition

MegaMek Configuration

Scenarios will take place on a map consisting of 6 standard size mapsheets arranged 3 sheets wide and 2 sheets tall. Each mapsheet will be selected from the official CGL maps currently available for sale.

The forces will enter the map on opposite sides, **N**orth and **S**outh.

Princess will use the default settings for Bravery, Self Preservation, Aggression, Herding, and Piloting Caution on each side. Forced Withdrawal will be disabled. All other default bot settings will be used.

The image shows a vertical stack of five sliders, each with a title and two descriptive phrases at the ends. A blue knob is positioned in the center of each slider.

- Bravery**: Run Away! (left) | I fear nothing! (right)
- Self Preservation**: It's only a flesh wound! (left) | It hurts! It really hurts! (right)
- Aggression**: Meek (left) | Berserker (right)
- Herding**: Lone Wolf (left) | Don't Leave Me! (right)
- Piloting Caution**: Highway Menace (left) | Never takes a risk. (right)

All default rules for MegaMek will be activated. No additional rules will be used. Quirks will not be used.

Scoring

The last force with units surviving is the victor. The final score for the winning side is the BV of the remaining units. The losing force earns 0 points. If neither force has units survive, then each side earns 0 points. If the game is a stalemate, then the side with

higher remaining BV wins and the score is the difference in remaining BV.

Tournament

The tournament will consist of two phases, Seeding and Bracket.

Seeding Phase

During the Seeding phase, each list will play a series of scenarios against lists representing historical forces. The total score across all 5 scenarios will determine the ranking of each player list. The maps for these scenarios will be the same for each list but will not be announced in advance. For each historical force, the scenarios will use the same arrangement of 6 maps from the official mapsheets representing a battle from the force's lore. The lists for the historical forces will not be announced in advance, but the historical forces are listed below:

- 1st Somerset Strikers
- Clan Wolf Beta Galaxy
- First Sword of Light
- ComGuard 1st Army
- Ryan's Rebels

Bracket Phase

After the Seeding phase, the lists will be ranked based upon the number of points earned. The tournament will consist of a [double elimination bracket](#). If the number of teams is not a power of 2, then the top ranked teams will receive a bye in the first round.

During each round, each pair of forces will play 3 scenarios and the winner will be determined by the total score across all three scenarios. In each round, all forces will use the same arrangement of 6 randomly selected maps of the same terrain type from the official mapsheets.
